

Complimentary Professional Development for Educators Technical Assistance Program (TAP)

LIVE VIRTUAL COMPLIMENTARY PROFESSIONAL DEVELOPMENT WORKSHOP VIA  ZOOM

Effective Data Collection in the Special Education Classroom: End of Year Focus

Wednesday, May 6, 2026

8:30-11:30 or 12:00-3:00

Presented by Chelsea Maher, M.Ed., TAP Consultant

Data collection is an essential element in the special education classroom. Data needs to be routinely collected, analyzed, and utilized in instructional and IEP planning. Having a data collection system with a thorough understanding of why we collect data and how to utilize it will set any special education classroom up for success! With the proper tools and training, all special educators can easily implement, utilize, and maintain a robust data collection system for all their students. In this training, special educators will learn:

- How to use and analyze data to inform and guide instruction and IEP goals
- *How to use End of Year data to inform planning and data collection systems for the next school year!*
- How to create and implement specific and simple data collection systems
- This training is designed for educators working with students with moderate to severe disabilities, however, the content is applicable to any educator who collects data!

The PM session is the same as the AM session. A Survey will be posted in the zoom chat at the end of the presentation. You must complete the survey to receive a Certificate of Completion. You can join the PM session if you miss part of the AM session.
