

PSFA and CES Statement Regarding the Use of CES Contracts

The Public School Facilities Authority (PSFA) and the Cooperative Educational Services (CES) organization want to let you know how we can all work together on the procurements of tangible items, services and construction projects in which PSFA is involved as a co-owner with School Districts (Districts) on System, Standard and Security Based projects funded from the Public School Capital Outlay Fund (PSCOF).

As a purchasing cooperative, united by a Joint Powers Agreement to assist public schools in New Mexico with the procurement of many products and services, CES agreements are a convenient and beneficial procurement methodology for Districts. CES cooperative agreements are allowed by the Procurement Code and are appropriate for PSCOF funded projects of items of tangible goods, services and construction. If a District has any questions or concerns regarding the use of a CES agreement for a PSCOF funded project it should consult directly with PSFA.

Professional Services

“Cooperative procurement agreements, are limited to the procurement of items of tangible personal property, services or construction.” (See Section 13-1-135 NMSA 1978 Subparagraph A). (See Sections 13-1-87 and 13-1-76 NMSA 1978). It is PSFA’s policy that if the services of an architect or engineer are required for a PSCOF funded project, a CES agreement cannot be utilized and will not be considered a proper procurement methodology for PSCOF projects. This also holds true for the use of surveyors, landscape architects, planners, researchers, construction managers and other persons or businesses providing similar professional services.

Dollar Thresholds

CES may have multiple awardees for indefinite quantity contracts that cover the same item and/or items and services. If more than one agreement exists, a District should obtain three (3) quotes, from CES contract-holders, if the purchase order will result in an amount of greater than \$60,000. This policy ensures that all CES awardees that cover the same item and/or items of tangible personal property and services all have an opportunity to be selected. The selection of an awardee through quotes ensures that the awardee can deliver the goods or services at the respective geographical location within the required time frame and at the best price. It also provides transparency to the selection of an awardee and further ensures that proper due diligence was conducted.

For services which include construction, roofing, asbestos abatement, plumbing, HVAC, landscaping and other such similar services, a purchase order shall not exceed \$1 Million excluding gross receipts tax. For these services, a District shall request three (3) quotes, from CES contract-holders, to include a statement of work. If a District decides to select a CES awardee other than the best price, the District shall include a written determination with justification for the selection to PSFA.

NMPSFA - Statewide Security System-Based Project

Cooperative Educational Services (CES) is honored to partner with NMPSFA to assist New Mexico's schools in augmenting their security systems by providing the following list of contracts for the security-related categories identified by NMPSFA.

Note: For certain trades, contracts may utilize RS Means (R), Gordian (G), or CES Line Item Pricing (C) as applicable. The school, at its discretion, will select the most appropriate contract to meet its needs.

* For questions regarding CES contracts and purchase orders: CES Procurement Dept. (505) 344-5470 x 116; CES Business Office (505) 344-5470 x 101
