LIVE VIRTUAL COMPLIMENTARY PROFESSIONAL DEVELOPMENT WORKSHOP VIA ZOOM

Useful Data Collection in the Special Education Classroom

Tuesday, October 6, 2026

8:30 - 11:30 AM or 12:00 - 3:00 PM

Presented by Chelsea Maher, M.Ed.

TAP Consultant

Data collection is an *essential* and *highly useful* element in any special education classroom. Creating a data collection system with a thorough understanding of *why* we collect data and *how* to utilize it will set any special education classroom up for success!

With the proper tools and training, all special educators can easily implement, utilize, and maintain a robust data collection system for all their students.

In this training, special educators will learn:

- How to use and analyze data to inform and guide instruction and IEP goals
- The collection and analysis process of multiple types of data including academic, behavioral, and IEP goal tracking
- How to create and implement specific yet simple data collection systems
- This training is designed for educators working with students with moderate to severe disabilities, however, the content is applicable to any educator who collects data!

The PM session is the same as the AM session. A Survey will be posted in the zoom chat at the end of the presentation. You must complete the survey to receive a Certificate of Completion. You can join the PM session if you miss part of the AM session.
