What happens before behavior occurs and what can we do to prevent challenging behavior?

As a result of attending this all-day *virtual* zoom webinar, attendees will be able to recognize and use evidence-based antecedent strategies and applied behavior analysis to assist students with academic and behavioral challenges.

Antecedent-Based Strategies are changes we can make to the environment to support students and reduce behaviors that interfere with their success.

We will review the basics of ABA, identify and model common behavior scenarios, introduce preventative evidence-based strategies and practice all that we have learned with fun case scenarios.

Participants will receive fantastic resources
