To get a complete understanding of the FBA & BIP process, you must sign up for the session on Behavior Intervention Plans scheduled Tuesday, February 14th. This virtual workshop will cover important concepts in writing effective FBAs for any environment. We will discuss the rationale for using a functional behavior assessment and how and when to determine when one is needed. Topics include:

- Identifying and defining the problem behavior
- Collecting and analyzing data
- Hypothesizing function
- Differentiating between a skill and performance deficits.

Using a provided case study and the FBA form, participants in small breakout-room groups will design an appropriate FBA for your case study student. **Be prepared to work!**

The same topic is presented in both AM and PM. Thank you!
